EXPERIENCE

USAva.Team, Remote, Illinois, US | Tbilisi, Georgia

Front-End Developer

July 2024 - January 2025

The projects that I worked on when I was in the USAva.Team.

- **B24 Chat**

  Website URL: b24chat.com

  Project Description:B24 Chat is a messaging platform designed to facilitate real-time communication for teams and businesses. The website was redesigned using Next.js and TypeScript to enhance communication capabilities, improve responsiveness, and create a more user-centric experience, ensuring seamless interaction across all devices.

  My Role: As a Front-End Developer, I contributed to the redesign by adding fingerprint and face ID authentication to streamline the login process and enhance security. I also addressed issues related to file uploading and style, ensuring a smoother, more user-friendly experience across the platform.

- **Beenimax**.

  Website URL: beenimax.com

  Project Description: Beenimax is a dynamic platform designed to offer a seamless and engaging experience for users consuming content. The website was redesigned to enhance functionality, improve user navigation, and optimize the platform for better performance. The goal was to provide an efficient and intuitive platform for users to interact with the content.

  My Role: Front-End Developer

Yerevan, AM

Armenian National Agrarian University

Degree in Agribusiness and Economics
September 2010 - August 2015
Yerevan, AM

N.V Gogol

Degree
September 2000 - August 2010
Yerevan, AM

- **FreedomTrans**.

  Website URL: freedomtrans.pl

  Project Description: FreedomTrans is a logistics platform aimed at optimizing freight transportation management. The redesign focused on enhancing the user interface and user experience to simplify the process of freight booking, tracking, and transportation coordination. The goal was to improve usability, accessibility, and overall user satisfaction while maintaining the platform's core functionality. By modernizing the design and integrating interactive features, the project aimed to provide a more intuitive, responsive, and efficient solution for logistics professionals.

  My Role: As a Front-End Developer, I redesigned the site based on Figma layouts, implementing the entire front-end using only HTML and CSS. I ensured a pixel-perfect design and added functionality for modals and map section integration, including location animations, using JavaScript. My work focused on creating a clean, responsive design optimized for all devices, providing a seamless user experience across screens of any size.

- **DV Group**.

  Website URL: dvgroup.com

  Project Description: DV Group is a corporate platform redesigned to reflect the brand's identity. I redesigned pages and fixed issues related to the news display, ensuring the platform is both responsive and user-friendly.

  My Role: As a Front-End Developer, I utilized Next.js to redesign critical pages, including the Home, Our Expertise, IT-Platform, About, and News pages, translating Figma layouts into high-quality, pixel-perfect, and responsive web components optimized for all devices. I fixed and refined the logic for displaying news content, ensuring accurate, dynamic, and efficient rendering across the platform. Additionally, I resolved various bugs, enhancing the platform's performance and usability. My work ensured the application adhered to modern web standards, delivering a polished, accessible, and efficient user experience.

- **Grohe Russia**

  Website URL: grohe-russia.shop

  Project Description: The Grohe plumbing stores website, an e-commerce platform, was redesigned using mobile-first technologies, Magento, HTML, CSS, and JavaScript to create a modern and responsive online shopping experience. The redesign focused on enhancing user navigation, optimizing

product displays, and improving the overall shopping experience across all devices. The layout was carefully crafted to ensure a consistent, engaging experience, allowing users to easily browse and purchase plumbing products.

My Role: As a Front-End Developer and a member of the team, I contributed to the redesign of the Grohe plumbing stores website, implementing mobile-first technology with pixel-perfect precision. My work focused on key pages such as About, Gift, and Contacts, where I utilized HTML, CSS, and JavaScript to ensure a modern, responsive design. I also added functionality to the information menu and other pages, enhancing the overall user experience and ensuring seamless interaction across all devices.

Codeidea LLC, On-site, Yerevan, AM
Full-Stack Developer
December 2021 - May 2024

The projects that I worked on when I was in the Codeidea team.

- SpaceTogether.

  Website url: spacetogether.com

  Project Description: SpaceTogether is a platform for finding and renting coworking spaces. It offers a user-friendly interface and comprehensive search functionality, making it easy for individuals and businesses to discover and book shared office spaces. The platform fosters community and collaboration, connecting space owners with renters to create vibrant work ecosystems..

  My Role: Worked with Laravel and Vue.js to develop platform features, ensuring seamless user interactions. Integrated the HelloSign API to enable online signatures for contracts between renters and rental providers. Redesigned the renter and rental provider step flow, utilizing existing front-end variables to improve the user experience, without making changes to the back-end logic.

- Dorsia.

  Website url: dorsia.com

  Project Description: Dorsia offers a platform for seamless dining experiences, including web and mobile applications with integrated POS terminals. Diners can make reservations, view live checks, pay via mobile app, and split checks. Restaurants benefit from reservation management and customer preference insights, enhancing revenue potential and optimizing table availability.

  My Role: Worked as a Web and Mobile Developer using React Native to build the platform's mobile application. Integrated

APIs for seamless reservations and online payment functionalities. Enabled real-time booking and payment features, ensuring a smooth experience for diners and restaurants. Designed and implemented pages based on Figma layouts, ensuring a responsive and visually appealing user interface.

- Intelevy.

  Website url: intellivy.net

  Project Description: Intellivy provides a platform for Amazon sellers, leveraging cutting-edge analytics and AI technology to monitor performance, identify trends, and optimize listings. The web and mobile applications offer personalized suggestions and strategies to maximize sales potential, helping sellers stay competitive and drive eCommerce success

  My Role: As a backend developer, I worked on integrating third-party tools and APIs into Intellivy's platform to provide analytics and AI-driven insights for Amazon sellers. Using Laravel and Vue.js, I developed and maintained API endpoints for data collection, analysis, and reporting. My contributions included implementing Elasticsearch for advanced search functionality and ensuring smooth communication with AWS infrastructure. I also collaborated on creating dashboards and optimizing backend processes to deliver real-time, actionable insights for users.

Codeidea LLC, Yerevan, AM

Internship

September 2021 - December 2021

- Collaborated with senior developers to debug and resolve software issues, enhancing application performance.
- Contributed to the design and implementation of user interfaces.
